

Position: Sr. Java Developer

Role Overview

Technical Lead skilled in delivery, development and maintenance of technology based products and services.

Responsibilities

- To lead a team of developers.
- Will work under the guidance of the PM/Architect/BA.
- To provide solutions to technical issues.
- To meet development schedules and ensuring the delivered solution meets the technical specifications and design requirements.
- Own one or more modules of the project under development.
- Flexible in working under changing and different work settings.
- Maintain high team morale.
- Adhere to company and project standards and guidelines.
- Quality, on time delivery of agreed deliverables.
- Manage complete development life cycle.

Skills & Abilities

- Extensive technical experience and development expertise in Core Java, J2EE, JSP, Servlets, Struts, Webservices, Spring, Hibernate, Java Script, JQuery and AJAX.
- Good Knowledge in SQL database. MySQL will be preferred.
- Possess advanced knowledge of object-oriented design and development (OOA/OOD) and the J2EE framework and data architectures.
- Exposure to mobile app development (Android/iOS).
- Experience of working with and applying Design patterns to solve problems.
- Hands on experience in Tomcat and Apache servers.
- Should have good understanding of web application theories and Structural Designs.
- Having a good sense of User Interface Design and aesthetics of a web will work in your favour.

Personal Attributes

- Demonstrate strong written and oral communication skills.
- Sound time management skills.
- Good ability to anticipate issues and formulate remedial actions.
- Sound interpersonal and team working skills.
- Sound ability to take on multiple assignments.
- Good problem solving skills.
- Easily adoptable to company culture.

Experience

- Software Engineer: **1-3 years** of experience in developing application software.
- Senior Software Engineer: **4-6 years** of relevant development experience, of which 1+ years must be as a Team Leader.
- Prior knowledge and experience with email applications and/or backup solutions will give you an edge.

Academic Qualification

- 5-7 years' experience in Java-J2EE Development.
- Prior experience as Team Lead or Senior Software Engineer.

Salary

As per industry standards.
